As a Frontend Developer, I excel in creating engaging user experiences with HTML, CSS (including Bootstrap and SASS/SCSS), and JavaScript (including ReactJS). In the realm of Business Systems Analysis, I specialize in streamlining operations and driving efficiency through integrated systems management.

PROFESSIONAL SKILLS

- **HTML** (Semantic Markup, JSX) & **CSS** (Bootstrap, Adaptive/Responsive, BEM, SASS/SCSS):
- **JavaScript** (TypeScript, ReactJS, Redux, React Hooks, entry-level NodeJS/Express)
- **Development Tools** (Webpack, ESLint, Prettier, Debugging, Testing)
- **Integrated Systems Management** (Workflow Automation: Zapier, Make.com, custom scripting; Data Management and Analysis: AirTable, Salesforce, PowerTools)
- **Ops Management & Business Systems Analysis** (project and quality management, strategic planning, resource allocation, process improvement, performance monitoring, presentation)

LANGUAGE SKILLS

- **Uzbek** - *Native*
- **English** - *Proficient (IELTS 8.0)*
- **Russian** - *Proficient*
- **French** - *Intermediate*

WORK EXPERIENCE

Global Friends - *Tashkent, Uzbekistan*   August 2021 - present
Business Systems Analyst and Operations Manager

- Was responsible for operations improvement with automations, portal and landing page development, technical support, and student enrollment coordination.
- Reduced processing time of document generation such as invoices and generic letters from 5 minutes to 1 second with a single click, achieving a 300-fold boost in efficiency.
- Improved data management efficiency significantly by implementing an integrated student portal which served as a centralized platform for managing student information.
- Boosted marketing strategies by developing customized landing pages for various services offered by the company. They are present in my web portfolio.
- Began as Operations Assistant and advanced to the current position in January 2022.

EPAM Systems - *Tashkent, Uzbekistan*   May 2021 - January 2022
Frontend Developer

- Designed and developed HTML/CSS layouts to support web application and component development projects, focusing on both functionality and UI optimization.
- Helped backend developers with frontend tasks for UI integration and performance improvement, as well as with adapting to new updates.
- Revamped online library and documentation portal web pages, enhancing readability and accessibility for improved UX and navigation efficiency.
- Completed a 3-months long internship program initially and transitioned to this position.
